The conservative leader, it will be recalled, bad declared that unless Great Britrin was prepared to devote the proceeds of a large loan to the building of a number of dread-noughts immediately, it would be found that the German navy would have a strength equal to that of Great Britain. The net result of this fresh sounding of the familiar alarm has been a temporary full in British conners and the preparation of figures by the admiralty which were designed to upset Mr Balfour's claims and damage his reputation as a sazadous leader. In other types of vessels, such as armored cruisers and torpedo craft, the British superiority will be even more noticeable.
